

Junior Surveyor

Job description

Reports to: Senior Surveyor

The Junior Surveyor is responsible to assist with conducting field surveys in various aspects of construction of the project with high level of accuracy, ensuring the design criteria is adhered to and well documented. They also take good care of all instruments and accessories and transport them to and from the field.

Responsibilities.

- Maintain and verify site control points and benchmarks.
- Running Total Stations, GPS and level instruments to perform required surveys.
- Ensure equipment is maintained and calibrated.
- Perform construction layout work in various stages accurately and efficiently.
- Perform quantity / as built surveys.
- Download field survey data and make records ready for processing and documentation.

Required Knowledge, Skills and Abilities

- Engineering or min. College level education in Surveying or Geomatics.
- Familiarity with and ability to understand construction, Total Station and GPS survey instruments specifically TOPCON equipment.
- Good written and oral communication skills.
- Experience or Familiarity with AutoCAD or other Autodesk based software.
- Good organizational skills & excellent attention to detail and accuracy.

- Minimum 2 years' experience in surveying for construction
- Basic knowledge and experience of survey data preparation for field surveys/download and process through instrument office software.

- Effective interpersonal and teamwork skills with a high level of dependability.

Working Conditions/ Physical Effort:

Basically, Jr. Surveyor works in the field (usual field conditions: running construction machinery around, running traffic, uneven field conditions and elevated platforms / formworks) or and he/she also has some duties in the office.

Job Type: Full-time
